Harvard Business School Case 200-041, January 2000. (Revised May 2007.) A loan officer must decide whether to lend \$8 million to a rapidly growing high technology company. The company has had a series of relationships with three other banks.

## **Dressen - Case - Harvard Business School**

Abstract. John Lynch, CEO of the Dressen Division of Westinghouse, was elated by the proposed leveraged buyout by the private equity firm, Warburg Pincus Ventures. The buyout would rid the division of a 'bad' parent and place the division's destiny in its own hands. A recently instituted restructuring plan seemed likely to improve profitability, but the turnaround was in its infancy.

Florian Resatsch investigates the optimal strategies for developing and evaluating ubiquitous computing applications based on Near Field Communication. He offers a range of design guidelines for NFC applications in four categories: NFC technology, tag infrastructure, devices, and human factors.

The information revolution has made for a radically more fluid knowledge environment, and the growth of venture capital has created inexorable pressure towards fast commercialisation of existing technologies Companies that don't use the technologies they develop are likely to lose them. Key features Over the past several years, Hank

# Acces PDF Harvard Business School Dressen Case Study Solutions

Chesbrough has done excellent research and writing on the commercialisation of technology and the changing role and context for R&D. This book represents a powerful synthesis of that work in the form of a new paradigm for managing corporate research and bringing new technologies to market. Chesbrough impressively articulates his ideas and how they connect to each other, weaving several disparate areas of work R&D, corporate venturing, spinoffs, licensing and intellectual property into a single coherent framework.

This Element describes for the first time the database of peer review reports at PLOS ONE, the largest scientific journal in the world, to which the authors had unique access.

Specifically, this Element presents the background contexts and histories of peer review, the data-handling sensitivities of this type of research, the typical properties of reports in the journal to which the authors had access, a taxonomy of the reports, and their sentiment arcs. This unique work thereby yields a compelling and unprecedented set of insights into the evolving state of peer review in the twenty-first century, at a crucial political moment for the transformation of science. It also, though, presents a study in radicalism and the ways in which PLOS's vision for science can be said to have effected change in the ultra-conservative contemporary university. This title is also available as Open Access on Cambridge Core.

This book offers a unique view of multilingualism in higher education from a global perspective. It presents a contextualised case of a multilingual language policy which takes the Content and Language Integrated Learning (CLIL) approach. The volume discusses various approaches to multilingual education including CLIL and then proposes guidelines for a multilingual language policy for Universitat

Jaume I in Castelló, Spain. It examines the advantages of a multilingual education programme and reviews the success of existing language policies. This book will be an essential resource for researchers and students as well as policy makers.

Every 3rd issue is a quarterly cumulation.

"The scholarship devoted to the complicity of German physicians in the Holocaust is rich and detailed, but there remains, as Michael Bryant demonstrates, still more to learn. It is well established that the techniques employed by the Nazis to exterminate Jews and others in concentration camps were first applied to people in state hospitals who were deemed mentally disabled or terminally ill. What has been less thoroughly investigated is the postwar response of both the Allies and the Germans to these atrocities. Bryant fills the gap with a systematic account of the judicial proceedings against those charged with killing the disabled." *New England Journal of Medicine*

This edited book focuses on current practices, challenges and innovations in the emerging field of English for Specific Purposes (ESP). By combining diverse, empirically-proven and innovative ESP practices from all over the world with inspiring theoretical input and reflections from experienced practitioners, the authors in this volume examine both best-practice examples and ESP programmes which by various metrics are deemed to have failed. This book will be of interest to practitioners, teacher educators and researchers working in the field of ESP, as well as readers interested in language education and curriculum development more

broadly.

Provides an approach for analyzing, discussing, and writing about cases. This book shows how to classify cases according to analytical task they require (solving a problem, making a decision, or forming an evaluation) and establish a base of knowledge about a case. It shows how to talk about cases in class.

New Directions in Development: A Study of U.S. AID Donald R. Mickelwait, Charles F. Sweet, and Elliott R. Morss In 1973 Congress legislated a fundamental change in U.S. foreign aid policy: rather than provide general assistance to developing nations, the U.S. Agency for International Development (AID) would focus on helping the rural poor in those nations. AID commissioned Development Alternatives, Inc. (DAI), to prepare a strategy for making the change toward "New Directions" in development and then to assist in the design and implementation of a number of projects using the new strategy. The authors describe the bureaucratic and administrative problems that confronted Development Alternatives in this job, giving particular attention to the administrative and bureaucratic barriers within AID itself. They conclude with a set of recommendations for reform that are essential if the agency is to attain its "New Directions" objectives.
