Roy Lichtenstein - Image Dupliator - 2013

The fact that Lichtenstein is lauded as an artistic genius while the creators of the images he appropriated - including industry giants like Jack Kirby, John Romita and Joe Kubert - remained uncredited has long been a sore point in the comics community, and the publicity surrounding the 2013 exhibition prompted a response from designer and artist Rian Hughes.

Whaam! is a 1963 diptych painting by the American artist Roy Lichtenstein. It is one of the best-known works of pop art, and among Lichtenstein's most important paintings. Whaam! was first exhibited at the Leo Castelli Gallery in New York City in 1963, and purchased by the Tate Gallery, London, in 1966.

Whaam! - Wikipedia

Bella Hadid, 24, transforms into a Roy Lichtenstein painting for Halloween. She stunned in a blue wig and expertly pixelated makeup as she brought the artist's creations to life

Roy Lichtenstein and the emergence of pop art.

"Roy Lichtenstein's distinctive paintings of the early 1960s are synonymous with the Pop art movement. These bold, oversized images inspired by newspaper advertisements and comic book scenes have been taken as reflecting the artist's fascination with the links between art and popular culture. In this highly readable and original book, Michael Lobel challenges this circumscribed view of Lichtenstein's work, offering a set of compelling new interpretations that reveal the artist's confrontation with a far wider range of issues. Lichtenstein's art is fundamentally engaged with a set of concerns central to art making in the postwar period: the relation between vision and technology, the possibility of articulating artistic identity, and the effect of mechanical reproduction on the work of art. Lichtenstein's project, Lobel argues, is structured by the tension between painting understood as a fully expressive, humanistic gesture and, conversely, as the product of a purely mechanical act. This handsomely illustrated book makes available for the first time an array of archival materials about Lichtenstein and his work, including photographs of the artist and many newly discovered sources for his imagery in the comics and advertisements of the early 1960s. It also provides new information on the context of the artist's Pop paintings in relation to contemporary developments in advertising culture, mechanical reproduction, and visual technologies. Examining the artist's work from fresh perspectives, the author not only offers a comprehensive analysis of Lichtenstein's early Pop paintings but also provides new insight into the issues that shaped the Pop art movement, artistic practices in the 1960s, and the historical relation between modern art and popular culture"--Publisher's description.

This fascinating book highlights the artist's early career as an illustrator and how it influenced his work as a painter and shaped his response to modernism.

Examines Roman architecture as a party of overall urban design and looks at arches, public buildings, tombs, columns, stairs, plazas, and streets

Chronicles the creation and evolution of the comic book industry, covering the working conditions, partnerships, and behind-the-scenes battles that shaped the formative decades of the genre.

Point, Dot, Period... The Dynamics of Punctuation in Text and Image is a collection of twelve previously unpublished essays which explore the fundamental role played by punctuation in the two semiotic fields of text and image. Whilst drawing upon a wide range of material, including painting, engraving, photography, video art, poetry, fiction, and journalism, each essay contributes to the exploration of singular uses of punctuation which highlight the complexity of what remains in all cases a silent, and yet particularly eloquent, mode of expression. By bringing together authors from a variety of fields, such as linguistics, literary studies, and art criticism, at a time when the relation between text and image occupies a prominent place in the critical landscape, this volume offers new insights into the possibility and nature of their encounter, and invites the reader to focus on the material aspect of visual and textual creation. This collection also offers an original approach to the works of some major artists and canonical authors, whilst simultaneously making room for emerging talents.

A Penguin Special on Roy Lichtenstein by Alastair Sooke - read in 2 hours or less 'Why, Brad Darling, this painting is a masterpiece! My, soon you'll have all of New York clamoring for your work!' Roy Lichtenstein - architect of Pop art, connoisseur of the comic strip, master of irony and prophet of popular culture. From exhilarating images of ice-cool jet pilots in dog fights, to blue-haired Barbie dolls drowning in scenes of domestic heartache, Lichtenstein's instantly recognisable paintings, with their Ben-Day dots and witty one-liners, defined the art of a generation. But how did a jobbing, unassuming painter of the Fifties become a world-famous Pop artist whose work today sells for millions? What do his paintings really tell us? And what is his legacy? This book, by art critic and broadcaster Alastair Sooke, is a perfect introduction to the artist and his work. Spanning Lichtenstein's career, and explaining his unique style, it is a journey through the life of one of the twentieth century's greatest artists. Published in time for a major new retrospective of the work of Roy Lichtenstein. 'Sooke is an immensely engaging character. He has none of the weighty self-regard that often afflicts art experts and critics; rather he approaches his subjects with a questioning, open, exploratory attitude' Sarah Vine, The Times 'His shows are excellent - clever, lively, scholarly, but not too lecturey; he's very good at linking his painters with the world outside the studio, and at how these artists have affected the world today' Sam Wollaston reviewing 'Modern Masters', Guardian Alastair Sooke is deputy art critic of the Daily Telegraph. He has written and presented documentaries on television and radio for the BBC, including Modern Masters, an acclaimed BBC One series that chronicled modern art in the twentieth century. Since 2009 he has reported regularly for The Culture Show on BBC Two. He was educated at Christ Church, Oxford, and at the Courtauld Institute of Art, London.

In 1848 there were thirteen commercial photographic studios in the city of Paris. By 1871 this number had expanded to almost 400. This book is the first to analyze the origins of professional photography during the Second Empire and its transformation from a novel curiosity to a vital part of the urban environment.

Christy Mag Uidhir presents a new theory of art. Few philosophers agree about what it is for something to be art, but most or all agree that art must be somehow intention-dependent. Mag Uidhir shows that this requirement has radical implications for the nature of art and of art forms, for the ontology of art, and for issues about authorship.
