The teacher guide accompanies the student activities books in macro and microeconomics for teaching collegelevel economics in AP Economics courses. The publication contains course outlines, unit plans, teaching instructions, and answers to the student activities and sample tests.

Principles of Economics in Context lays out the principles of micro- and macroeconomics in a manner that is thorough, up to date, and relevant to students, attuned to the economic realities of the world around them. It offers engaging treatment of important current topics such as new thinking in behavioral economics, financial instability and market bubbles, debt and deficits, and policy responses to the problems of unemployment, inequality, and environmental sustainability. This new, affordable edition combines the just-released new editions of Microeconomics in Context and Macroeconomics in Context to provide an integrated full-year text covering all aspects of both micro and macro analysis and application, with many up-to-date examples and extensive supporting web resources for instructors and students. Key features include: An eye-opening statistical portrait of the United States; Clear explanation of basic concepts and analytical tools, with advanced models presented in optional chapter appendices; Presentation of policy issues in historical, institutional, social, political, and ethical context--an approach that fosters critical evaluation of the standard microeconomic models, such as welfare analysis, labor markets, and market competition; Issues of human well-being, both domestic and global, are given central importance, enriching the topics and analytical tools to which students are introduced; The theme of sustainability--financial, social, and ecological--is thoroughly integrated in the book, with chapters on alternatives to standard GDP measurement, the environment, common property, public goods, and growth and sustainability in the twenty-first century; Full complement of instructor and student support materials online, including test banks and grading through Canvas.

Controlling inflation is among the most important objectives of economic policy. By maintaining price stability, policy makers are able to reduce uncertainty, improve price-monitoring mechanisms, and facilitate more efficient planning and allocation of resources, thereby raising productivity. This volume focuses on understanding the causes of the Great Inflation of the 1970s and '80s, which saw rising inflation in many nations, and which propelled interest rates across the developing world into the double digits. In the decades since, the immediate cause of the period's rise in inflation has been the subject of considerable debate. Among the areas of contention are the role of monetary policy in driving inflation and the implications this had both for policy design and for evaluating the performance of those who set the policy. Here, contributors map monetary policy from the 1960s to the present, shedding light on the ways in which the lessons of the Great Inflation were absorbed and applied to today's global and increasingly complex economic environment.

Curriculum guide for economics education in grades 9-12 based on Economics America from the National Council on Economic Education.

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Teachers and students learn about the complementary relationship between their own economic wellbeing and the natural resources of the environment. The lessons can be used in high school economics, environmental studies, social issues and natural science courses.
