versatile and accessible introduction to the subject. It assumes only a background in high school algebra, enables instructors to follow tailored pathways through the material, and is the only textbook of its kind designed specifically for an introductory course in the computational science and engineering curriculum. While the text itself is generic, an accompanying website offers tutorials and files in a variety of software packages. This fully updated and expanded edition features two new chapters on agent-based simulations and modeling with matrices, ten new project modules, and an additional module on diffusion. Besides increased treatment of high-performance computing and its applications, the book also includes additional quick review questions with answers, exercises, and individual and team projects. Long a source for quotations, fragments, and factoids, the *Noctes Atticae* of Aulus Gellius offers hundreds of brief but vivid glimpses of Roman intellectual life. In this book Joseph Howley demonstrates how the work may be read as a literary text in its own right, and discusses the rich evidence it provides for the ancient history of reading,

thought, and intellectual culture. He argues that Gellius is in close conversation with predecessors both Greek and Latin, such as Plutarch and Pliny the Elder, and also offers new ways of making sense of the text's 'miscellaneous' qualities, like its disorder and its table of contents. Dealing with topics ranging from the framing of literary quotations to the treatment of contemporary celebrities who appear in its pages, this book offers a new way to learn from the *Noctes* about the world of Roman reading and thought.

Comprehensive. Detailed. Practical. Set Lighting Technician's Handbook, Fourth Edition, is a friendly, hands-on manual covering the day-to-day practices, equipment, and tricks of the trade essential to anyone doing motion picture lighting, including the lamp operator, rigging crew, gaffer, best boy, or director of photography.

This handbook offers a wealth of practical technical information, useful techniques, as well as aesthetic discussions. The Set Lighting Technician's Handbook focuses on what is important when working on-set: trouble-shooting, teamwork, set protocol, and safety. It describes tricks and techniques for operating a vast array of lighting equipment including LEDs, xenons, camera synchronous strobes, black lights, underwater units, lighting effects units, and many others. Since its first edition, this handy on-set reference continues to be widely adopted as a training and reference manual by union training programs as well as top university film production programs. New to the fourth edition: * Detailed information on LED technology and gear * Harmonized with union safety and training procedures * All the latest and greatest DMX gadgets, including remote control systems * Many new and useful lights and how to use
