As the phoenix emerges from its ashes, Zebian emerges ablaze in these pages, not only as a survivor of abuse, but as a teacher and healer for all those who have struggled to understand, reclaim, and rise above a history of pain. The book is divided into six chapters, and six stages of healing: Falling, Burning to Ashes, Sparks of Phoenix, Rising, Soaring, and finally, A New Chapter, which demonstrates a healthy response to new love as the result of authentic healing. With her characteristic vulnerability, courage, and softness, Zebian seeks to empower those who have been made to feel ashamed, silenced, or afraid; she urges them, through gentle advice and personal revelation, to raise their voices, rise up, and soar.

With a basis in environmental history, this groundbreaking study challenges the idea that a meaningful attachment to nature and the outdoors is contrary to the black experience. The discussion shows that contemporary African American culture is usually seen as an urban culture, one that arose out of the Great Migration and has contributed to international trends in fashion, music, and the arts ever since. However, because of this urban focus, many African Americans are not at peace with their rich but tangled agrarian legacy. On one hand, the book shows, nature and violence are connected in black memory, especially in disturbing images such as slave ships on the ocean, exhaustion in the fields, dogs in the woods, and dead bodies hanging from trees. In contrast, though, there is also a competing tradition of African American stewardship of the land that should be better known. Emphasizing the tradition of black environmentalism and using storytelling techniques to dramatize the work of black naturalists, this account corrects the record and urges interested urban dwellers to get back to the land.

“Steadily—by redefining green—Jones is making sure that our planet and our people will not just survive but also thrive in a clean-energy economy.” —Leonardo DiCaprio A New York Times bestseller, *The Green Collar Economy* by award-winning human rights activist and environmental leader Van Jones delivers a much-needed economic and environmental solution to today’s two most critical problems. With a revised introduction and new afterword by the author—a man who counsels President Barack Obama on environmental policy—*The Green Collar Economy* and Jones have been highly praised by a multitude of leaders and legislators, including Al Gore, Senator Tom Daschle, and Speaker of the House Nancy Pelosi. Van Jones was named one of “The World’s 100 Most Influential People of 2009” by Time magazine, and with *The Green Collar Economy* he offers a wise, necessary, and eminently achievable plan for saving the earth and rescuing working class Americans.

America knew George Zimmer for one of the most famous slogans in television advertising history: “I guarantee it.” Zimmer rode his promise to lead the Men’s Wearhouse to unimagined success as a retail giant. Now, years removed from his stunning dismissal as leader of the company he founded, *I Guarantee It* recounts the journey of Zimmer’s rise, the fall of the Men’s Wearhouse, and his personal renewal. For forty-one years, George Zimmer forged a relationship with American men who wanted to like the way they looked without getting too fussy about it. He made them a promise that came straight from the shoulder: “I guarantee it,” he said, and it was ironclad. By the millions, customers walked into The Men’s Wearhouse stores in all fifty states and Canada, where they received “quality, service, and a good price,” where they

bought suits, ties, sports coats, and slacks by the tens of billions of dollars. Then a backstabbing — the handpicked board of directors fired Zimmer from the company he had created and developed into the most successful men's specialty store in world history. Eight years later, Zimmer is back to tell his story: a man raised by a prosperous and loving family, a fun-loving son of the sixties, a merchant, an entrepreneur, a pitchman for the ages. Zimmer's ouster devastated but did not destroy him. His is a story of hard work and resilience, about a life in business that succeeded beyond belief and followed the Golden Rule. It's a story that will teach and inspire. He guarantees it.

This book presents the Clarendon Lectures in Finance by one of the leading exponents of financial booms and crises. Hyun Song Shin's work has shed light on the recent global financial crisis and he has been a central figure in the policy debates. The paradox of the global financial crisis is that it erupted in an era when risk management was at the core of the management of the most sophisticated financial institutions. This book explains why. The severity of the crisis is explained by financial development that put marketable assets at the heart of the financial system, and the increased sophistication of financial institutions that held and traded the assets. Step by step, the lectures build an analytical framework that take the reader through the economics behind the fluctuations in the price of risk and the boom-bust dynamics that follow. The book examines the role played by market-to-market accounting rules and securitisation in amplifying the crisis, and draws lessons for financial architecture, financial regulation and monetary policy. This book will be of interest to all serious students of economics and finance who want to delve beneath the outward manifestations to grasp the underlying dynamics of the boom-bust cycle in a modern financial system - a system where banking and capital market developments have become inseparable.
