Public Policy Analysis, the most widely cited book on the subject, provides readers with a comprehensive methodology of public policy analysis. Starting from the premise that policy analysis is an applied social science discipline designed for solving practical problems facing public and nonprofit organizations, the book bridges the gap between theory and practice. It provides practical skills for conducting policy analysis and communicating findings through memos, position papers, and other forms of structured analytical writing. The book asks readers to critically analyze the arguments of policy practitioners as well as political scientists, economists, and political philosophers.

Because of the increasing breadth and complexity of the field, most texts for introductory-level, general anthropology courses (so-called four-field courses) have

tended to become longer and more detailed. In contrast, this concise book, authored by a physical anthropologist, offers a tightly managed amount of detail and a student-friendly narrative approach (explaining its topics through a clear sequence of ideas), while including all of the traditional topics in anthropology.

For courses in Machine Design. An integrated, case-based approach to machine design Machine Design: An Integrated Approach, 6th Edition presents machine design in an up-to-date and thorough manner with an emphasis on design. Author Robert Norton draws on his 50-plus years of experience in mechanical engineering design, both in industry and as a consultant, as well as 40 of those years as a university instructor in mechanical engineering design. Written at a level aimed at junior-senior mechanical engineering students, the textbook emphasizes failure theory and analysis as well as the synthesis and design aspects of machine elements. Independent of any particular computer program, the book points out the commonality of the analytical approaches needed to design a wide variety of elements and emphasizes the use of computer-aided engineering as an approach to the design and analysis of these classes of problems. Also available with Mastering Engineering Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student.
