The intellectual legacy of Seymour Sarason continues to serve as a critical resource for the field of community psychology. The present paper draws on one of Sarason's favorite aphorisms and two of his seminal writings to suggest the relevance of ideas articulated 35-40 years ago for the current time. Each in their own way highlights the importance of unearthing and interrogating core assumptions underlying our research and our efforts to make a positive difference.

Sarason has relentlessly challenged conventional thinking about why schools seem so resistant to change. Fried introduces Sarason as a ‘sculptor of ideas’ who has shaped the ideas of many scholars and educators over the years. Some of the ideas he has shared are: 1. Every school has a culture that defines how people within it operate. Culture affects people in ways they acknowledge as well as in ways that are hidden from their consciousness.

Seymour Sarason: Sculptor of Ideas

Seymour Sarason, in the words of Carl Glickman, is "one of America's seminal thinkers about public education." For over four decades his has been a voice of much-needed skepticism about our plans for school reform, teacher training, and educational psychology. Now, for the first time, Sarason's essential writings on these and other issues are collected together, offering student and researcher alike with the range, depth, and originality of Sarason's contributions to American thinking on schooling. As we go from debate to debate on issues such as school choice, charter schools, inclusive education, national standards, and other problems that seem to drag on without solution, Sarason's critical stance on the folly of many of our attempts to fix schools has always had at the center a concern for the main players in our educational institutions: the students, the teachers and the parents. Any plans that cannot account for their well-being are doomed to failure. And in the face of such failure, the clarity of Sarason's vision for real educational success is a much-needed antidote to much of the rhetoric that currently passes for substantial debate. A wide-ranging and comprehensive selection of Sarason's most significant writings,The Skeptical Visionaryshould find a prized space on any student's or teacher's bookshelf. Author note:Robert Friedis Associate Professor in the School of Education at Northeastern University, and is the author ofThe Passionate Teacher: A Practical GuideandThe Passionate Learner: How Teachers and Parents Can Help Children Reclaim the Joy of Discovery.Seymour Sarasonis Professor Emeritus in the Department of Psychology at Yale University. He is the author of over forty books and is considered to be one of the most significant researchers in education and educational psychology in the country.

In his most recent work and with his usual perceptiveness, Seymour Sarason probes the topic of teaching as a performing art. Refreshingly, Dr. Sarason focuses on the often-overlooked role of teachers in galvanizing an audience—their students. Sarason argues that teachers will better engage learners if they are prepared in the artistry of doing so. Sarason sees teachers as actors and thus uses the traditions of stage performance to inspire ways to foster connections between teachers and students. Sarason elucidates how the rehearsal processes actors undergo and the direction they receive, for example, would be similarly beneficial for educators. Recognizing that implementing his ideas would require a profound rethinking of teacher training programs, Sarason urges why they are crucial to excellence in education. As always, Sarason’s writing is rich with insight garnered from 45 years of teaching and a lifetime devotion to educational issues. His book is essential for teachers and teacher educators and an excellent resource for anyone interested in educational topics. “Once again, Sarason, like other great teachers and artists, has us pause at the moral center of what we thought we knew long enough to recognize truths we might otherwise neglect. Just as he guided our understanding of school cultures and school reform, this book reshapes what we previously thought of as “the art of teaching.” —Jeannie Oakes, Professor of Education at University of California, Los Angeles “Seymour Sarason thinks he has something new to say. Indeed, he has. Furthermore, he writes about a domain anyone who has taught in educational institutions identifies with immediately but is almost barren of attention. There are insight, great writing, and passion here, but don’t look for a repetition of anything Sarason has written before. To the thousands of psychologists, sociologists, and teachers of teachers already nourished by Sarason’s writing, this book will add the audience of teachers in and out of schools that he has always wanted to reach.” —John Goodlad, Co-director, Center for Educational Renewal, University of Washington, and President, Institute for Educational Inquiry

This unique resource promotes the creation of productive learning contexts, which allow students to bring all that they are to the learning process, as essential to successful educational reform.

Featuring 25½ new content, the fifth edition of Contemporary Issues in Curriculum addresses issues in implementation, planning, and evaluation of curriculum at all levels of learning. Divided into six parts—Philosophy, Teaching, Learning, Instruction, Supervision, and Policy— the new edition of this balanced yet eclectic text features ten new chapters written by notable authors including Larry Cuban, Howard Gardner, Andrew Hargreaves, Linda Darling-Hammond, and Stanley Poprow. With each new chapter, readers are asked to consider a new author’s viewpoint, thought process, and conclusions about significant and current curriculum issues, from traditional and commonly accepted beliefs to more controversial and cotemporary ideas. Through a variety of learning aids and discussion questions, readers are encouraged to analyze and debate these issues, to formulate their own opinions, and begin to shape their own original ideas about the future direction of curriculum. Focus Questions at the beginning of each chapter offer an advance organizer and encourage critical thinking. Discussion Questions at the end of each chapter encourage student analysis as well as opportunities for further thought and classroom dialogue. Case Studies at the end of each Partinitiate thoughtful discussion of how curriculum issues are played out in the in-service world. “Pro-Con Chart” features succinctly detail the argument and counterargument for the issue covered in each part, allowing readers to better understand the complexities. Curriculum Scholar Profiles at the beginning of each section highlight the achievements of six prominent leaders in the curriculum field.

Creativity can be taught and nurtured, and we can build classrooms in which creativity thrives. This philosophy acts as a central thesis in a new book, Organic Creativity in the Classroom, edited by award-winning author Jane Piirto, Ph.D. This innovative collection of essays explores approaches to teaching creativity from the perspective of experienced educators and artists. The 23 authors have taught for more than 500 years combined, and in this book they share teaching stories and helpful strategies that can be used to encourage students to become more creative within specific domains. The authors include master teachers, curriculum theorists, holistic educators, and award-winning practitioners of writing, mathematics, science, social science, literature, foreign language, theater, songwriting, dance, music, and arts education, among other domains, who incorporate creativity and intuition into their classrooms. In this readable and lively book, they share their personal stories and practical advice for infusing creativity into the lives of students.

The works presented are moving and impressive; their authenticity and tone in harmony with the story teller's voice. The story itself may open new windows ... for those intent on enriching and humanizing what occurs in contemporary schools. - Maxine Greene A fabulous book for arts and theater education. -Merryl Goldberg Author of Integrating the Arts, Third Edition Are you a theatre teaching artist, or considering it? No matter what kind of educational setting you're in, the theatre skills you teach are intimately linked to your own artistry: you've got to know how to teach from your own practice while you learn to practice the art of teaching. The key is discovering how the educational setting, the students, and the stage link. A Teaching Artist at Work helps theatre teaching artists develop connections between their pedagogical and artistic selves. The book presents a framework for thinking about the work of teaching artists in general and theatre teaching artists in particular. Through descriptive examinations of practice, the book also provides theatre teaching artists and those who prepare and work beside them with concrete examples of three theatre-education projects in three different educational settings as well as the collaborative processes that helped them succeed. Replicable in other settings—such as community outreach programs, after school and summer programs hosted by professional theatres, and not-for-profit educational theatres—these projects provide a jumping-off point for others who work to create interesting theatre curriculum. In any educational setting, theatre teaching artists create spaces where teachers and students can envision a new, different, and exciting way of learning and doing that they can apply to theatre education and many other content areas. With emphasis on linking personal artistry with pedagogical artistry and examples drawn from McKean's own practice, A Teaching Artist At Work is an invaluable resource for teaching artists and the arts-education community.

This study explores and develops the idea that foreign language teaching can be an art. This encompasses both considering the meaning of artistry in language teaching as well as the possibilities which artistic processes offer pupils in language learning. The first part focuses on the in-service education of language teachers in theatre and improvisation workshops, the second part examines pupils rehearsing and performing a full length play in a foreign language. Thus, this work views the fields of language teacher education and foreign language learning within a common conceptual framework.

This insightful book taps into current concerns over changes in school, home, workplace, and society at large. Sarason examines sexual liberation, changes in child-rearing patterns and attitudes on the abortion issue, the growing tension between individual and community rights, and the increasingly politicized dynamics of social institutions in general and schools in particular. Through his acute analysis of the past, Sarason enables us to understand and recognize the elements that will have the biggest impact on our future.

Byers (expressive arts therapies, Lesley University) and Forinash (music therapy, Lesley University) assemble contributors in arts therapy, education, counseling, and psychiatry to recount the transformative experiences they have had in their relationships with those they mentor and guide. By exploring contemporary concepts in reciprocal learning, they challenge and inspire readers to examine their own engagement in the process of lifelong transformative learning. The book will of interest to students in arts therapy. Annotation 42004 Book News, Inc., Portland, OR (booknews.com).

In this second edition of his original insightful collection of letters to the first president of the 21st century, Seymour B. Sarason details how to rethink school reform.
