The best-selling Stealing the Network series reaches its climactic conclusion as law enforcement and organized crime form a high-tech web in an attempt to bring down the shadowy hacker-villain known as Knuth in the most technically sophisticated Stealing book yet. Stealing the Network: How to Own a Shadow is the final book in Syngress's ground breaking, best-selling, Stealing the Network series. As with previous title, How to Own a Shadow is a fictional story that demonstrates accurate, highly detailed scenarios of computer intrusions and counter-strikes. In How to Own a Thief, Knuth, the master-mind, shadowy figure from previous books, is tracked across the world and the Web by cyber adversaries with skill to match his own. Readers will be amazed at how Knuth, Law Enforcement, and Organized crime twist and torque everything from game stations, printers and fax machines to service provider class switches and routers steal, deceive, and obfuscate. From physical security to open source information gathering, Stealing the Network: How to Own a Shadow will entertain and educate the reader on every page. The final book in the Stealing the Network series will be a must read for the 50,000 readers worldwide of the first three titles Law enforcement and security professionals will gain practical, technical knowledge for apprehending the most supplicated cyber-adversaries

"Stealing the Network: How to Own the Box is a unique book in the fiction department. It combines stories that are fictional, with technology that is real. While none of the stories have happened, there is no reason why they could not. You could argue it provides a road map for criminal hackers, but I say it does something else: it provides a glimpse into the creative minds

It is almost as if the authors peered into the future as many of the techniques and scenarios in these books have come to pass. This book contains all of the material from each of the four books in the Stealing the Network series. All of the stories and tech from: How to Own the Box How to Own a Continent How to Own an Identity How to Own a Shadow Plus: Finally - find out how the story ends! The final chapter is here! A DVD full of behind the scenes stories and insider info about the making of these cult classics! * Now for the first time the entire series is one 1000+ page book * The DVD contains 20 minutes of behind the scenes footage * Readers will finally learn the fate of "Knuth" in the much anticipated Final Chapter

From a leading cultural journalist, the definitive cultural history of female showrunners—including exclusive interviews with such influential figures as Shonda Rhimes, Amy Sherman-Palladino, Mindy Kaling, Amy Schumer, and many more. —An urgent and entertaining history of the transformative powers of women in TV— (Kirkus Reviews, starred review). In recent years, women have radically transformed the television industry both behind and in front of the camera. From Murphy Brown to 30 Rock and beyond, these shows and the extraordinary

Get Free Stealing The Network How To Own A Continent

women behind them have shaken up the entertainment landscape, making it look as if equal opportunities abound. But it took decades of determination in the face of outright exclusion to reach this new era. In this "sharp, funny, and gorgeously researched" (Emily Nussbaum, *The New Yorker*) book, veteran journalist Joy Press tells the story of the maverick women who broke through the barricades and the iconic shows that redefined the television landscape starting with Diane English and Roseanne Barr—and even incited controversy that reached as far as the White House. Drawing on a wealth of original interviews with the key players like Amy Sherman-Palladino (*Gilmore Girls*), Jenji Kohan (*Orange is the New Black*), and Jill Soloway (*Transparent*) who created storylines and characters that changed how women are seen and how they see themselves, this is the exhilarating behind-the-scenes story of a cultural revolution.

A few years ago, MySpace.com was just an idea kicking around a Southern California spam mill. Scroll down to the present day and MySpace is one of the most visited Internet destinations in America, displaying more than 40 billion webpage views per month and generating nearly \$1 billion annually for Rupert Murdoch's online empire. Even by the standards of the Internet age, the MySpace saga is an astounding growth story, which climaxed with the site's acquisition by Murdoch's News Corporation in 2005 for a sum approaching one billion dollars. But more than that, it may be the defining drama of the digital era. In *Stealing MySpace*, Pulitzer Prize-winning journalist Julia Angwin chronicles the rise of this Internet powerhouse. With an unerring eye, Angwin details how MySpace took the Internet by storm by grabbing the best ideas from around the Web, encouraging pinup stars such as

Get Free Stealing The Network How To Own A Continent

Tila Tequila to make their home on its pages and giving everyone freedom to experiment with online identities—including using somebody else’s identity. Stealing MySpace introduces us to the site’s founders, Chris DeWolfe and Tom Anderson, who dabbled in computer hacking, online pornography, spam, and spyware before starting MySpace. Although their street savvy, doggedness, and clubbing skills far eclipsed their tech prowess, they stumbled their way to success and soon found themselves at ground zero of a high-stakes war that pitted Rupert Murdoch against his frequent nemesis, the combative Viacom CEO Sumner Redstone. Angwin sheds light on the dizzying backroom deals that allowed Murdoch to snatch MySpace from Viacom’s grasp even as the MySpace founders remained in the dark about their own fate. Then she takes us inside the Murdoch empire as DeWolfe and Anderson lobby furiously to regain control of their creation. Venturing beyond the business aspects of the story, Angwin also explores the Internet culture, a voyeuristic world in which MySpace must stay one step ahead of amateur pornographers, sexual predators, and “spoofers” who set up fake profiles (Rupert Murdoch himself tolerates dozens of phony “Ruperts” on the site) and cope with the general excesses and sometimes illegal acts of a community of account holders equal in number to the population of Japan. In Stealing MySpace, Julia Angwin dishes on the epic real-world battle for control of a virtual empire. In a savvy, smart, fast-paced narrative reminiscent of Bryan Burrough and John Helyar’s Barbarians at the Gate and Michael Lewis’s The New New Thing, Stealing MySpace tells is the whole gripping story behind a breakout cultural phenomenon.

How big data is transforming the creative industries, and how those industries can use lessons

Get Free Stealing The Network How To Own A Continent

from Netflix, Amazon, and Apple to fight back. " The authors explain] gently yet firmly exactly how the internet threatens established ways and what can and cannot be done about it. Their book should be required for anyone who wishes to believe that nothing much has changed." --The Wall Street Journal "Packed with examples, from the nimble-footed who reacted quickly to adapt their businesses, to laggards who lost empires." --Financial Times Traditional network television programming has always followed the same script: executives approve a pilot, order a trial number of episodes, and broadcast them, expecting viewers to watch a given show on their television sets at the same time every week. But then came Netflix's House of Cards. Netflix gauged the show's potential from data it had gathered about subscribers' preferences, ordered two seasons without seeing a pilot, and uploaded the first thirteen episodes all at once for viewers to watch whenever they wanted on the devices of their choice. In this book, Michael Smith and Rahul Telang, experts on entertainment analytics, show how the success of House of Cards upended the film and TV industries--and how companies like Amazon and Apple are changing the rules in other entertainment industries, notably publishing and music. We're living through a period of unprecedented technological disruption in the entertainment industries. Just about everything is affected: pricing, production, distribution, piracy. Smith and Telang discuss niche products and the long tail, product differentiation, price discrimination, and incentives for users not to steal content. To survive and succeed, businesses have to adapt rapidly and creatively. Smith and Telang explain how. How can companies discover who their customers are, what they want, and how much they are willing to pay for it? Data. The entertainment industries, must learn to play a little "moneyball." The bottom line: follow the data.

Get Free Stealing The Network How To Own A Continent

In April 1862, 20 Union soldiers crossed Confederate lines to steal a locomotive called the General and destroy a critical Confederate supply line. In the aftermath half the team was executed; the half that escaped received the newly established Medal of Honor. -- publishers description.

When he retired as the chief security officer of New York City's Metropolitan Museum of Art, John Barelli had spent the better part of forty years responsible not only for one of the richest treasure troves on the planet, but the museum's staff, the millions of visitors, as well as American presidents, royalty, and heads of state from around the world. For the first time, John Barelli shares his experiences of the crimes that occurred on his watch; the investigations that captured thieves and recovered artwork; the lessons he learned and shared with law enforcement professionals in the United States and abroad; the accidents and near misses; and a few mysteries that were sadly never solved. He takes readers behind the scenes at the Met, introduces curators and administrators, walks the empty corridors after hours, and shares what it's like to get the call that an ancient masterpiece has gone missing. The Metropolitan Museum covers twelve acres in the heart of Manhattan and is filled with five thousand years of work by history's great artists known and unknown: Goya, da Vinci, Rembrandt, Warhol, Pollack, Egyptian mummies, Babylonian treasures, Colonial crafts, and Greek vases. John and a small staff of security professionals housed within the Museum were responsible for all of it. Over the years, John helped make the museum the state-of-the-art facility it is today and created a legacy in art security for decades to come. Focusing on six thefts but filled with

Get Free Stealing The Network How To Own A Continent

countless stories that span the late 1970s on into the 21st century, John opens the files on thefts, shows how museum personnel along with local and sometimes Federal Agents opened investigations and more often than not caught the thief. But of ultimate importance was the recovery of the artwork, including Celtic and Egyptian gold, French tapestries, Greek sculpture, and more. At the heart of this book there will always be art—those who love it and those who take it, two groups of people that are far from mutually exclusive.

The charismatic forger immortalized in *Catch Me If You Can* exposes the astonishing tactics of today's identity theft criminals and offers powerful strategies to thwart them based on his second career as an acclaimed fraud-fighting consultant. When Frank Abagnale trains law enforcement officers around the country about identity theft, he asks officers for their names and addresses and nothing more. In a matter of hours he can obtain everything he would need to steal their lives: Social Security numbers, dates of birth, current salaries, checking account numbers, the names of everyone in their families, and more. This illustrates how easy it is for anyone from anywhere in the world to assume our identities and in a matter of hours devastate our lives in ways that can take years to recover from. Considering that a fresh victim is hit every four seconds, *Stealing Your Life* is the reference everyone needs by an unsurpassed authority on the latest identity theft schemes. Consider these sobering facts: □ Six out of ten American companies and government agencies have already been hacked. □ An estimated 80 percent of birth certificate requests are fulfilled through the mail for people using only a name and a return address. □ Americans write 39 billion checks a year, and half of them never reconcile their bank statements. □ A Social Security number costs \$49 on the black market. A

Get Free Stealing The Network How To Own A Continent

driver's license goes for \$90. A birth certificate will set you back \$79. Abagnale offers dozens of concrete steps to transform anyone from an easy mark into a hard case that criminals are likely to bypass: □ Don't allow your kids to use the computer on which you do online banking and store financial records (children are apt to download games and attachments that host damaging viruses or attract spyware). □ Beware of offers that appeal to greed or fear in exchange for personal data. □ Monitor your credit report regularly and know if anyone's been □knocking on your door.□ □ Read privacy statements carefully and choose to opt out of sharing information whenever possible. Brimming with anecdotes of creative criminality that are as entertaining as they are enlightening, *Stealing Your Life* is the practical way to shield yourself from one of today's most nefarious and common crimes.

This book on computer security threats explores the computer security threats and includes a broad set of solutions to defend the computer systems from these threats. The book is triggered by the understanding that digitalization and growing dependence on the Internet poses an increased risk of computer security threats in the modern world. The chapters discuss different research frontiers in computer security with algorithms and implementation details for use in the real world. Researchers and practitioners in areas such as statistics, pattern recognition, machine learning, artificial intelligence, deep learning, data mining, data analytics and visualization are contributing to the field of computer security. The intended audience of this book will mainly consist of researchers, research students, practitioners, data analysts, and business professionals who seek information on computer security threats and its defensive measures.
